Erase Dark Spots

Don't get mad at your skin, get even. A few simple tweaks to your regimen is all it takes

**1
PREP**
Rough skin can make dark spots way more noticeable. An exfoliating cleanser with brightening benefits will smooth out your skin with the bonus of making it more even-toned, says dermatologist Dr. Jeanine Downie.

Neutrogena
Visibly Even
Foaming
Cleanser, \$8;
at drugstores

**2
PREVENT**
So many things can lead to splotchiness—pimples, sunburn and even exposure to fluorescent lights, says Dr. Downie. Stop discoloration by using a serum that has ingredients like vitamin C or linoleic acid day and night.

**3
CORRECT**
Spot a new spot? If you move fast, you can prob fix it before it gets worse. Swap out your night cream for a gentle overnight glycolic peel. It'll softly slough away darkness while you sleep.

Garnier SkinActive
Clearly Brighter
Overnight Leave-On
Peel, \$17; at drugstores
