FOR IMMEDIATE RELEASE

January 17, 2020

LaseMD TREATMENT, THE LATEST INNOVATION IN LASER SKIN REJUVENATION, NOW AVAILABLE AT THE IMAGE DERMATOLOGY IN MONTCLAIR, NJ 07042

LaseMD for brighter, baby-soft skin is quickly growing in popularity in the aesthetic industry and major cities globally.

Montclair, NJ, January 17, 2020– If you are looking for a non-ablative, yet highly effective treatment to rejuvenate your skin with none of the downtime of traditional laser treatments, you can find LaseMD right on Park Street in Montclair, NJ 07042. LaseMD treatments make it possible to have a more youthful and bright appearance without having to worry about missing work or social events. The treatment is comfortable and quick (only taking 5-20 minutes) and you can immediately return to your normal activities. LaseMD is customizable based on your needs - whether you are looking for a light resurfacing to give you that glow before a special occasion or a deeper treatment to address fine lines, pigmentation and moderate to severe sun damage, LaseMD is the perfect addition to your skincare routine.

More than just a beauty device, LaseMD is FDA approved to remove actinic keratosis, or AK, which is a pre-cancerous growth on the skin caused by overexposure to UV rays. The American Academy of Dermatology estimates that 60% of people who are at a higher risk to develop AK's (more common in individuals with fair skin and light eyes/hair, people with a history of cumulative sun exposure and those with weakened immune systems) will get at least one in their lifetime. While most AK's remain benign, approximately 10% develop into squamous cell carcinoma within two years so it is important to treat them in the early stages.

"I had a LaseMD treatment a few weeks ago. The procedure was very quick and tolerable. I experienced some redness immediately following the treatment, but I was able to return to my normal activities right away and wear makeup the next day. It took a couple of days for my skin to exfoliate, but by day three, my complexion was much smoother and brighter." – Michelle, Manhattan, NY

See what all the buzz is about by booking your LaseMD consultation today!
